

Lake Singletary Septic System Information Request Form

The Lake Singletary Watershed Association (LSWA) is in the process of updating the Lake Management Plan that was published in 1995. The revised plan will take into account the many changes in the watershed and will use the years of water quality data obtained by the LSWA to define the health of the lake and to produce a comprehensive set of prioritized goals to maintain or improve the quality of Lake Singletary and its watershed. The information being requested below will be used by our contractor to estimate phosphorous loading, a critical component of our lake's health. Please note that this information will be used only for this purpose and the individual system information WILL NOT be shared with anyone other than our contractor. Your cooperation is greatly appreciated.

Property Information

Please provide information about the following property. If exact information is not known, please approximate as best as you can.

Owners Name: _____

Property Address: _____

Number of bedrooms _____ Number of baths _____ Number of full-time residents _____
